

DATE: May 28, 2009
TO: All Personnel Monitored for Exposure to Ionizing Radiation who fall under the provisions of 10 CFR 19.13(b).
FROM: Richard R. Brey, Radiation Safety Officer
SUBJECT: 2008 Annual Occupational Radiation Exposure Report

This report is furnished to you under the provisions of the Nuclear Regulatory Commission Regulation 10 CFR Part 19. Specifically, 10 CFR 19.13(b) requires that licensees must provide an annual report to each individual monitored of the dose received in that monitoring year if (1) the individual's occupational dose exceeds 1 millisievert (100 millirem) TEDE or 1 mSv (100 mrem) to any individual organ or tissue or (if) the individual requests his or her annual dose report. This report is being provided because you have either exceeded an occupational dose of 100 millirem or requested a report. You should preserve this report for future reference.

On the annual report (enclosed), Blocks 11 through 14 show the types of monitoring that you had for the year, i.e., either skin, (deep or shallow) or whole body. The "Committed Effective Dose Equivalent" and the "Committed Organ Dose Equivalent" are shown in Blocks 15 and 16, respectively. Block 17 shows the "Total Effective Dose Equivalent" and Block 18 represents the "Total Organ Dose Equivalent".

It should be noted that "ND" refers to dose equivalents below the minimum reportable quantity of 1 mrem for a given dosimeter and time period.

The dose units are in "rem". Ensure that all of the personal information is correct: name, social security number, date of birth and sex. If there are any errors or questions about the report, please contact the Technical Safety Office at 282-2310.
